

Enics Switzerland is a top technology partner for Industrial and Medical Electronics. We focus on a comprehensive Life Cycle Management for products and systems in close partnership with our customers. We have an outstanding know-how in System Integration, RoHS-Conformity and Life Extension.

#### To make a substantial contribution to our customers' success we offer:

- **Innovation** thanks to proactive New Product Introduction (NPI)
- **Flexibility** due to expert handling of a wide product range (1800 different types) and a global network
- **Predictability** through clear interfaces as well as geographical and cultural proximity to our customers
- **Reliability** due to delivery accuracy and high service quality based on approved production and test processes
- **Safety** thanks to a wide range of services at one location for the whole life cycle and over 40 years of experience in EMS

#### Our services at a glance:

- Extensive **Electronics Manufacturing Services** (EMS) like Design Support, Engineering Services, New Product Introduction, Prototyping, Serial- and Special Part Production and After Sales Services
- **Life Cycle Management**
- **System Integration** – from the instalment of a single system into a housing up to the integration of whole systems including end tests through Enics
- Assessed **RoHS-support** thanks to a 3-step conversion model (analysis, modification and implementation)
- Gateway to the worldwide Enics network (technology transfer for high volume production)

#### Facts & Figures:

- High mix, medium- to low-volume manufacturing
- Quality certifications: ISO 9001:2000, 14001:2004 and 13485:2003
- 280 employees
- Floor space 12 000 m<sup>2</sup>
- General Manager: Martin Tanner
