

**Your Best Possible Partner in
Industrial and Medical Electronics**

Enics is one of the largest electronics manufacturing services (EMS) companies in the Industrial and Medical Electronics field

Enics is an Electronic Manufacturing Service Company – but not only an EMS provider. Our specific focus is the global industrial and medical business and our operating model is to take care of the total product life cycle.

Our customer gets the specific solution he needs and he gets it when he wants it. But he can also be sure that he gets our full attention tomorrow.

Our relationship with customers is based on mutual trust and understanding. Our customers know that we are unique because no one else has the same global expertise on the total product life cycle.

Service Offering

Enics comprehensive and networked services for industrial and medical electronics offer unique advantages. At Enics, customers can count on quality, cost efficiency, flexibility and reliability.

Enics has a deep market know-how and we focus on the complete life cycle of customers product. Customers benefit from increased operational time and higher security regarding contractual obligations with end-customers. Above all, our services are gaining time, creativity and know-how for our customers which they can invest directly into the development of new successful products.

We serve them locally, offering them simultaneously the power and flexibility of our global network!
