

We provide the best care of your products!

Enics Switzerland is your top technology partner in Industrial and Medical Electronics. Finding innovative solutions for your demands on After Sales has been a matter of concern to us for over 40 years: We offer extensive preventive maintenance and repair services in order to extend the lifecycle of your products, and to minimize the risk of breakdown occurrences even after years of operation.

We want to make a substantial contribution to your success. Our After Sales Services offer you:

- Efficiency** thanks to cost-optimized and proven measures that take your product's entire lifecycle, as well as the total cost-of-ownership, into account.
- Flexibility** thanks to our comprehensive and strong competences in After Sales Services.
- Innovation** thanks to proactive solutions that are based, e. g., on the systematic analysis of field returns.
- Security** thanks to tailor-made service agreements that enable you to fulfil your long-term obligations toward your end-customers.
- Reliability** thanks to highly qualified, long-standing employees, established processes and logistic concepts, and over 40 years of experience in After Sales Services.

Efficient Spare Parts Production

A speedy, competent and efficient production of spare parts helps you to minimize downtime and resulting costs, thereby avoiding a possible loss of image. Our services include spare parts production and testing, component consulting, express delivery and management of process-relevant data, as well as established and flexible logistics concepts.

Expert Repair and Analysis

With the help of a wide range of specialized tools, test systems and our qualified employees, we can repair your product in the most efficient way. Our repair and analysis services include professional cleaning, inspection, restoration of functionality, upgrading, maintenance, testing and repair reporting.

Preventive Maintenance

Thanks to preventive maintenance services such as cleaning, inspections, upgrading, testing and special reporting, the operating life of your products is prolonged, their efficiency is extended and the systems' availability is increased. Tailor-made maintenance concepts guarantee cost-optimized solutions.

Long-standing Service Agreements

Our service agreements enable you to fulfil long-term obligations toward your end-customers. The agreements are tailor-made to your needs and include the management of documentation and component availability, the support of production and test infrastructure, and the maintenance of production and repair know-how.

Supportive Outsourcing

By transferring product families to Enics, you gain precious time, which can be invested into your core competences. Further benefits: profit from our profound and varied expertise, delegate complexity, and leave the research of new technology and legal conditions (e.g., in the field of environmental protection) to us.
