

Enics Group

EMS partner of choice for industrial electronics (IE)

Manufacturing Service Company – but not only an EMS provider. Our specific focus is the global industrial business and our operating model is to take care of the total product life cycle.

Our customer gets the specific solution they need, and they get it when they want it. But he can also be sure that he gets our full attention tomorrow.

Our relationship with customers is based on mutual trust and understanding. Our customers know that we are unique because no one else has the same global expertise on the total product lifecycle of Industrial Electronics.

Service Offering

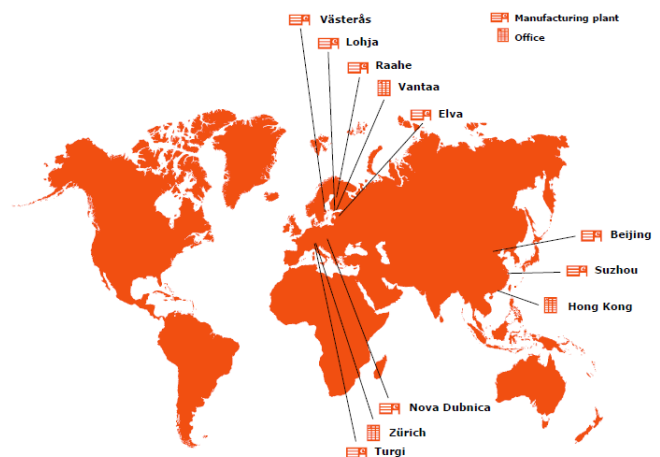

Enics comprehensive and networked services for professional electronics offer unique advantages. At Enics, customers can count on quality, cost efficiency, flexibility and reliability.

Enics has a deep market know-how and we focus on the complete lifecycle of the customers' product. Customers benefit from increased operational time and higher security regarding contractual obligations with end-customers. Above all, our services are gaining time, creativity and know-how for our customers which they can invest directly into the development of new successful products.
